A Communist Nation Survivor on Socialism and the American Dream

By Dr. Carol Swain 1 week ago

The Democratic Socialists of America are on the rise. We now have several in Congress, including the famed Alexandria Ocasio-Cortez, Rashida Tlaib, and Bernie Sanders. These members of Congress hope to remake America in their ideal of what a fully socialist country would look like. Never mind that socialism has failed around the world, most recently in Venezuela. The socialists believe that socialism is the cure for poverty, inequality, and injustice. Joining me today to make sense of the nonsense is **Dr. Ming Wang**.

Dr. Wang lived through the cultural revolution in China and is a fierce opponent of socialism and communism. Dr. Wang lived through the cultural revolution in China before coming to America. He is the founding director of the Wang Vision 3D Cataract and LASIK Center in Nashville. He is also an honors graduate of Harvard Medical School and MIT and has a doctorate in laser physics.

BOOK: **From Darkness to Sight: How One Man Turned Hardship into Healing**
