Sight is based on the inspiring true story of Dr. Ming Wang. The film chronicles Dr. Wang's incredible journey from China to America, including his struggles with poverty and racial discrimination, and his pursuit to become a world-renowned eye surgeon who would design a new technology to help restore sight to millions. At the height of his success, Dr. Wang met a six-year-old orphan from India who had been intentionally blinded, and he was thrown into a tailspin in which he had to come face-to-face with his own traumatic past before he could help anyone in the present.

Dr. Ming Wang, Harvard & MIT (MD, magna cum laude); PhD (laser physics), is the co-founder of the Common Ground Network and the Wang Foundation for Sight Restoration which has helped patients from over 40 states in the U.S. and 55 countries, with all sight restoration surgeries performed free-of-charge.
